

Prisma Multi-Asset Funds

The range of risk targeted multi-asset funds

Prisma Funds putting risk & return centre stage

Recognising that customers require investment solutions that match their needs, we developed the Prisma Multi-Asset Funds. The Prisma Funds aim to generate long-term capital growth and target specific levels of volatility with returns appropriate to your clients' calculated risk profiles.

Risk Targeted

Five investment funds designed to achieve ESMA* risk profiles 2 through to 6.

Built on Expertise

Zurich Investments consists of experienced and highly-qualified investment specialists, with a proven track record of making the right asset allocation decisions at the right times.

Actively Managed

Active asset management by Zurich Investments is at the heart of each of the Prisma Funds. Our approach to active management means that our investment managers can respond quickly to market movements.

NAME OF TAXABLE PARTY OF THE OWNER, WHEN

Diversified

Each multi-asset fund is diversified and can include equities, bonds, property, cash and alternatives. Alternatives may include, but are not limited to; oil, gold, inflation-linked government bonds, soft commodities, industrial metals and corporate bonds.

Great Value

The Prisma Funds are competitively priced at the normal Zurich product annual management charge.

^{*} European Securities and Markets Authority.

Five risk targeted solutions

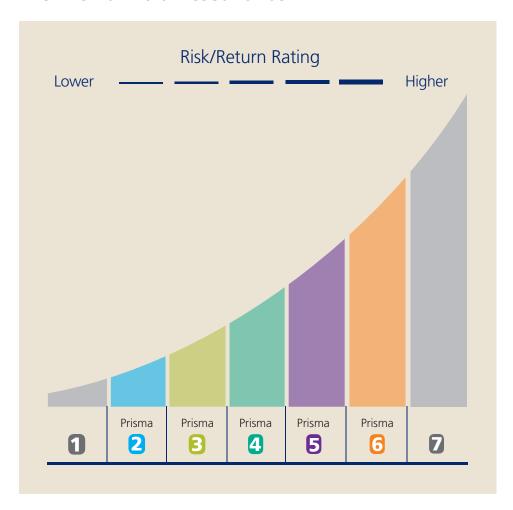

No one wants to take unnecessary risks with their investment but there is an important trade-off between risk and return. Exposure to appropriate levels of risk is paramount and the use of risk profile tools can help you to determine the level of risk acceptable to individual customers.

The Zurich Platform provides a direct route into investment solutions that

can target the calculated risk profile of your customer. Zurich's Prisma Funds are designed and managed to defined risk targets - risk targets that match the ESMA (European Securities and Markets Authority) volatility scale.

The five Prisma Funds are targeted to match risk profiles 2 through to 6 and each of the funds will aim to achieve the desired level of risk over time.

The Prisma Multi-Asset Funds

What are the ESMA ratings and how do they work?

The bull and bear markets of the past decade highlighted the need for a greater understanding of the risk and return trade off.

As such, ESMA has produced objective guidelines as to how investment risk and return should be presented to investors. These guidelines have been adopted throughout the Life, Pensions

and Investment industries, not only in Ireland but throughout Europe.

The ESMA guidelines use a 7 point scale to classify funds based on the 5-year annualised volatility of an investment fund. The table below provides you with the various risk bands associated with the ESMA rating scale.

Risk Rating	Volatility Ranges					
	Equal to or above	Less than				
1	0%	0.5%				
2	0.5%	2%				
3	2%	5%				
4	5%	10%				
5	10%	15%				
6	15%	25%				
7	25%+					

Source: Zurich, August 2015.

To understand where different asset classes fit within the ESMA scale, we have outlined below the volatility of the Irish Domestic Pension (IDP) sector averages, to give a clearer picture as to where certain funds might typically sit.

Sector	Volatility	Potential Risk Rating
IDP Cash	0.18%	1
IDP With Profits	1.26%	2
IDP Bonds	4.48%	3
IDP Managed Cautious	5.44%	4
IDP Balanced Managed	12.48%	5
IDP International Equity	17.22%	6

Warning: Past performance is not a reliable guide to future performance.

Diversification across a global market

The investment universe of the Prisma Funds has a global reach - extending across global equities, bonds, property, cash and alternatives. Each asset class will tend to deliver different levels of performance at different stages of the economic cycle.

Many of these asset classes have lower correlations to movements in equity prices and, hence, can help to dampen the long-term volatility of the fund's return. For example, with Prisma 5, the addition of alternatives, such as gold, to the fund mix

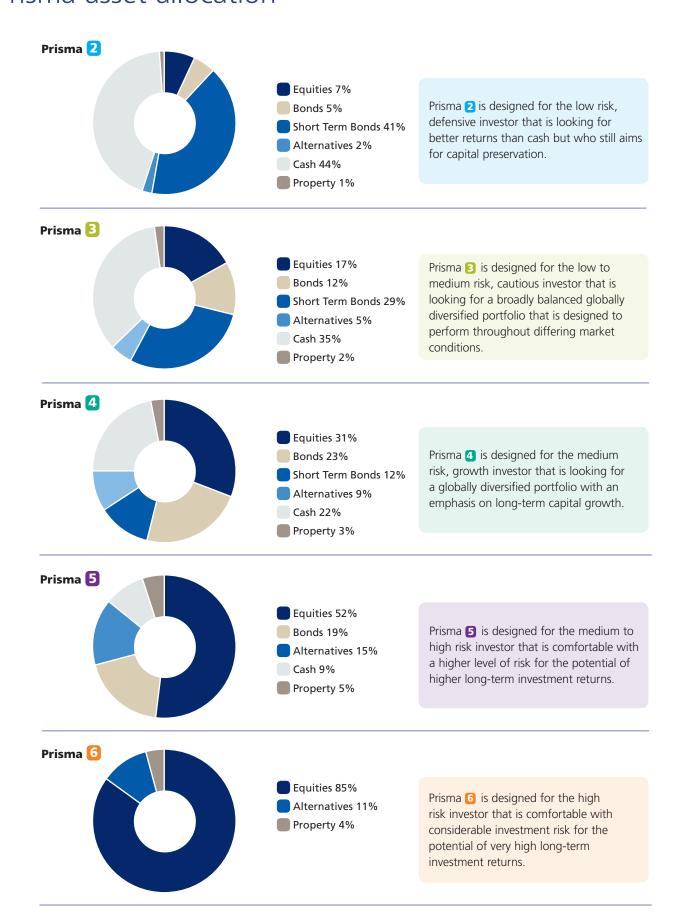

helps to ensure diversification as gold returns have a very low correlation with equity returns.

The Zurich investment team makes asset allocation decisions on a continuous basis, and these decisions will impact the allocation to each asset class within the funds. Each Prisma Fund will also be managed so that it aims to stay within its volatility range.

Typical investment range of the funds

Equities 0% - 20% 10% - 35% 20% - 50% 30% - 80% 50% - 100% Property 0% - 5% 0% - 15% 0% - 10% - 20% 0% - 20% 0% - 20% 0% - 20% 0% - 20% 0% - 20% 0% - 20% 0% - 25% Bonds 0% - 20% 0% - 20% 0% - 30% 0% - 35% 0% - 55% 0% - 75% 0% - 75% 0% - 75% 0% - 75% 0% - 30% 0% - 30% 0% - 5% 0% - 50% 0% - 30% 0% - 5% 0% - 20% 0% - 30% 0% - 5% 0% - 20% 0% - 30% 0% - 5% 0% - 20% 0% - 30% 0% - 5% 0% - 20% 0% - 30% 0% - 5% 0% - 20% 0% - 30% 0% - 5% 0% - 20% 0% - 30% 0% - 5% 0% - 20% 0% - 30% 0% - 5% 0% - 20% 0% - 30% 0% - 5% 0% - 20% 0% - 30% 0% - 5% 0% 0% - 30% 0% - 5% 0% 0% - 30% 0% - 5% 0% 0% - 30% 0% - 5% 0% 0% - 30% 0% - 5% 0% 0% - 30% 0% - 5% 0% - 30% 0% - 5% 0% 0% - 30% 0% - 5% 0% 0% - 30% 0% - 5% 0% 0% - 30% 0% - 5% 0% 0% - 30% 0% - 5% 0% 0% - 30% 0% - 5% 0% 0% - 30% 0% - 5% 0% 0% - 30% 0% - 5% 0% 0% - 30% 0% - 5% 0% 0% - 30% 0% - 30% 0% - 5% 0% 0% - 5% 0% 0% - 5% 0% 0% - 5% 0% 0% - 5% 0% 0% - 5% 0% 0% - 5% 0% 0% - 5% 0% 0% 0% - 5% 0% 0% - 5% 0% 0% 0% - 5% 0% 0% 0% - 5% 0% 0% 0% - 5% 0% 0% 0% 0% - 5% 0% 0% 0% 0% 0% 0% 0% 0% 0% 0% 0% 0% 0%	4	A STATE OF THE PARTY OF THE PAR	Asset Class	Prisma 2	Prisma 🖪	Prisma 4	Prisma 5	Prisma 6

Zurich Investments an investment manager you can believe in

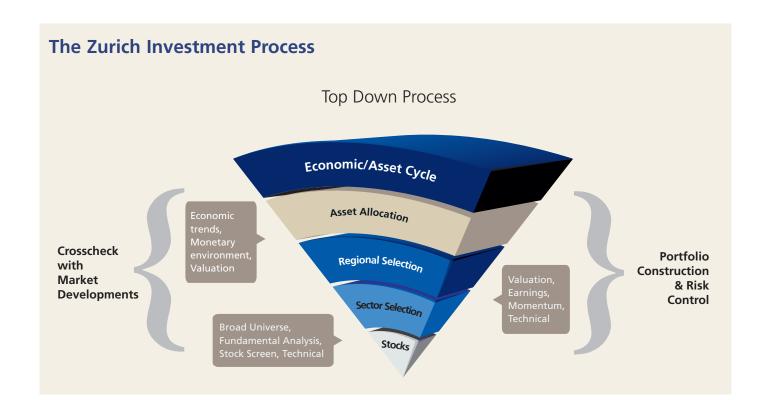

At Zurich Investments, we believe that it is the close co-operation of our investment managers in making decisions across assets, markets and sectors that make the Prisma Funds stand out from the crowd.

Our Philosophy

We believe that the macro economic environment is the key driver for investment market themes. We are business cycle investors constructing our portfolios to allow us to take advantage of opportunities over all parts of the economic cycle. Portfolios may at any time show either a growth or a value bias depending on prevailing macro economic views.

Our Process

We believe that market inefficiencies justify an active management approach to all levels of the investment process - asset allocation, geographical bias, sector preference and stock selection. We use a 'top-down' or 'big picture' investment approach to identify the best investment opportunities.

A team based approach

Our process emphasises teamwork rather than individual flair. Asset allocation decisions are made by the Strategy Group, which meets on a weekly basis. However, as all members work together in the same dealing room, discussion is ongoing, which allows for immediate analysis of, and reaction to, pertinent market changes. Changes to asset allocation are made within an agreed timeframe, depending on key drivers which the group feels dictate the change.

Our investment team combines extensive knowledge with experience and longevity; the most senior members of the team have worked together for well over ten years, while others, who have joined the team in more recent years, have worked in the industry for a significant length of time.

Active asset management to match investor's needs

It is widely accepted that the key driver to long-term investment returns within an investor's portfolio is asset allocation. Asset allocation decisions have become increasingly complex over the years due to market volatility and an ever changing global economic landscape. Zurich has built its investment reputation on the ability to make the right investment decisions at the right times.

If you look more closely at some of the investment decisions made by our investment team over the years, you can very clearly see the value of our active approach to investment returns.
